

Ali Nasser

iOS Engineer | Swift & SwiftUI | Performance & Secure Mobile Apps

Website : <https://a360n.github.io/> | GitHub : github.com/a360n/ | LinkedIn : [ali-nasser-b197b5279/](https://www.linkedin.com/in/ali-nasser-b197b5279/)

PROFILE

iOS Engineer with strong experience building and maintaining native iOS applications using Swift, SwiftUI, and UIKit. I focus on clean architecture, performance optimization, and delivering secure, scalable mobile apps used in real-world scenarios. Experienced in working with APIs, data persistence, and modern iOS development best practices.

PROJECTS

- iOS Security Scanner**

Open-source Swift-based CLI tool for analyzing iOS app packages (.ipa/.app) to detect common security and configuration issues. Built to support secure release workflows for iOS developers.

- Secure Vault**

Secure Vault is a native iOS password manager built with SwiftUI and Core Data, featuring AES-256 encryption, biometric authentication, and optimized local data storage with a focus on performance and UX.

- PenTest Hub**

PenTest Hub is a lightweight and modular web vulnerability scanner designed for penetration testers, cybersecurity students, and security researchers. It allows you to quickly scan a target website for common web vulnerabilities and generate detailed HTML and PDF reports.

SKILLS

- iOS Development (Swift, SwiftUI, UIKit)
- App Architecture & State Management
- REST APIs, Networking & JSON
- Core Data & Firebase Integration
- Performance Optimization & Memory Management
- Mobile App Security (AES-256, CryptoKit)
- Python Scripting & Automation

CERTIFICATIONS

GDSC Lead Certificate of Completion (2023–2024)
Issued by Google for Developers for successfully serving as a Google Developer Student Club Lead during the 2023–2024 academic year.

EDUCATION

Bachelor’s Degree in Cybersecurity (Expected 2026)
Focus on secure software development, cryptography, and mobile application security.
